FARHAN ALAM

BCA Student | Django / Python Full-Stack Web Developer

Kanpur, Uttar Pradesh, India | farhanalam8510@gmail.com | linkedin.com/in/farhan-alam-b590b840 | github.com/farhanalam851

SUMMARY

BCA student and aspiring full-stack web developer with hands-on experience building web applications using Python, Django, Django REST Framework, JavaScript, HTML, CSS, Bootstrap, and SQL. Experienced in developing complete Django applications with authentication, database models, product/catalog systems, order management, payment integration, invoices, reviews, and admin functionality. Focused on production-oriented web projects and junior web development opportunities.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3 Backend: Django, Django REST Framework, REST APIs, Django ORM

Frontend: Bootstrap, Responsive Web Design Databases: MySQL, PostgreSQL, SQLite

Tools: Git, GitHub, VS Code Other: Authentication, CRUD, Payment Integration, PDF Invoices, Order Management

PROJECTS

B2B Clothing E-Commerce Platform — Django

GitHub: github.com/farhanalam851/Cloth-WebSite

- Developed a full-stack B2B clothing e-commerce platform using Django, Bootstrap, HTML, CSS, and JavaScript.
- Built database-driven product and category management for a wholesale clothing business.
- Implemented authentication, registration, login, profiles, and account functionality.
- Developed shopping and order workflows with company details, GSTIN, shipping address, phone, and email.
- Added payment workflow and order statuses including pending, paid, failed, shipped, delivered, and cancelled.
- Implemented shipping and tax calculation, PDF invoice generation, clothing size/colour variants, and customer reviews/ratings.
- Built administrative functionality for managing products, categories, users, and orders.
- Used Django ORM and relational database models across customers, products, orders, and related data.

Django Blog Platform — Django

GitHub: github.com/farhanalam851/DJANGO-BLOG-WEBSITE

- Developed a complete blog platform with authentication, profiles, posts, likes, image uploads, and author permissions.
- Implemented author-based CRUD and user-specific post pages; configured PostgreSQL, WhiteNoise, and Gunicorn for production deployment.

Django REST API — Django REST Framework

- Built REST API endpoints, serializers, validation, URL routing, and request/response handling with Django REST Framework.
- Practiced CRUD-oriented API development and model serialization.

JavaScript Web Projects

Amazon Clone | Todo List | Tic Tac Toe | Rock Paper Scissors | Calculator

- Built interactive browser applications using DOM manipulation, event handling, objects, arrays, localStorage, and modular JavaScript.

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Virendra Swarup Institute of Computer Studies | Currently pursuing

Class XII — The Ganges World School

CURRENT FOCUS

Full-Stack Web Development • Django & Django REST Framework • JavaScript • REST APIs • Database Design • Production-oriented client projects
